

JANUARY 2012

Wishing you and your families a Happy Holidays and Prosperous New Year!

No "U-Turn" Sign Removed From West Bernardo Drive

After many calls to the City of San Diego, you might have noticed the "No U-Turn" sign on West Bernardo Drive has been removed. This will allow cars intending to go to our neighboring Starbucks Plaza the ability to U-Turn further away from our Building protecting our Tenants both in their cars and on foot!

Recycle Program at RBC

Please remember that we do have a Recycling Program at the RBC. If you need any information, please contact the Management Office at 858.673.5687, by email at Info@RBCCourtaryd.com or stop by Suite 160.

Please Report Any Suspicious Behavior to Knight Security at 760.745.3604 or call 911.

- * Make sure all doors and windows are secure.
- * Do not leave valuables (i.e. laptops, cell phones, cash, checks, etc...) visible in your car or office.
- * Take the time to get to know your neighbors.

Thank You For Your Cooperation!

WELCOME TMAD TAYLOR & GAINES

Founded in 1955, TTG offers full service engineering, facilities programming and construction support services. With a team of over 450 professionals throughout 13 locations in five states, their services cover the full spectrum of engineering including: mechanical, electrical, plumbing, structural and civil, and specialized services including Commissioning, LEED Certification, Energy, and BIM/Integrated Project Delivery services. TTG's approach is to offer Proactive Services at Cost Saving Solutions.

Their facility programming services offer a flexible approach to the planning and pre-design process for healthcare, institutional and medically related facilities. In addition to TTG's full service engineering and facility programming services, they also offer PM/CM support needed to successfully carry your project from planning through construction phases.

In more than 55 years as a consulting engineering firm, they have acquired experience from a vast array of projects, numbering more than 40,000 with an aggregate construction cost of over \$40 billion of engineered systems.
