## WELCOME TEMBOO!

Temboo is the latest addition to Rancho Bernardo Courtyard, and we're thrilled to be here! Temboo is a growing technology company that's designed a graphical, subscription-based IT interoperability and data management service that runs in the cloud. It allows businesses to connect unrelated information systems using the equipment they already have, and empowers individuals to create data workflow applications with little or no programming experience.

The heart of the Temboo service is Choreographies, or Choreos for short -- small, highly shareable applications that conduct business processes across dissimilar systems, handling all necessary communication and data transformation along the way.

Choreographies:

Are visually designed in a graphical, drag-and-drop application that requires no coding experience or software development background

Can access multiple data sources on demand, including databases, FTP and email servers, MQ, and applications like Salesforce

Are modular, so complex Choreographies can consist of many simpler ones

Can be run via Triggers, our compact add-ins for third-party applications like Microsoft Excel

## HAPPY ANNIVERSARY!

October 2009 marked the 15th anniversary of the RBC being a local family owned and operated office building! Thanks to local community support, we were able to commemorate this milestone in several print publications including the San Diego Union Tribune (another article of which will be running this Sunday, 12/27/09), The RB Sun and other local publications. If you'd like to see any of these features, please stop by the Management Office in Suite 160!

We'd like to also take this opportunity to thank all of our wonderful Tenants (past and present), vendors and employees for their loyalty! We would not still be here if it weren't for you and look forward to many more great years together!

## WELCOME TEMBOO CONTINUED...

Are self-contained and independent of third-party programming languages, so they can be shared over the Web without compatibility concerns

The Temboo service:

Scales available computing capacity on demand in the cloud

Handles all maintenance quickly and transparently

Consolidates all configuration and administration in the same graphical application used to design and execute Choreos

Grants permission to access data resources at an extremely fine level for maximum security

In short, we liberate the information companies and individuals need to do business by bringing the power previously reserved for the enterprise to everyone. So whether you're a corporate business manager, small- or micro-business owner, independent vendor, or tech-savvy Web jockey, Temboo connects you and your clients to vital information without huge investments in time, money, or training.

Imagine:

Visually designed workflows so elegant and flexible they're called Choreographies

Your information systems interoperating securely in the cloud

Paying only for the infrastructure you need, when you need it

Key business data accessible anytime, anywhere

IT and business management working in harmony, not at odds

Temboo is growing fast, so we're filling a few key positions and scouting for beta testers and pilot-program clients. If you're interested, go to [www.temboo.com](http://www.temboo.com) to see our current job openings or submit a contact form. And feel free to drop by Suite 250 for a visit!
